 Mail Box and Bldg/Room Location: 10B60 Results Format Preferred (circle): PAPER DISK E-MAIL

If more than one search is submitted, please prioritize searches in order of need.

Please provide a detailed statement of the search topic, and describe as specifically as possible the subject matter to be searched. Include the elected species or structures, keywords, synonyms, acronyms, and registry numbers, and combine with the concept or utility of the invention. Define any terms that may have a special meaning. Give examples or relevant citations, authors, etc, if known. Please attach a copy of the cover sheet, pertinent claims, and abstract.

Title of Invention: Doll having changeable eyes and removable alternative face

Inventors (please provide full names):

Cassidy Park, Tina Yang, Elaine Marans

Earliest Priority Filing Date: 6/30/2003

For Sequence Searches Only Please include all pertinent information (parent, child, divisional, or issued patent numbers) along with the appropriate serial number.

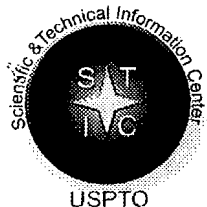

Please refer to highlighted portions of the claims & drawings.

- A doll head comprising a facial mask that can be snapped onto the head ~~via~~ via a snap fit. Connection between the ear portions of the doll head and the ear elements of the facial mask.

Thank you

Search Notes

Attached are the search results for the doll with the removable mask, including prior art searches in foreign and international patent databases; product and general news non-patent literature databases; and the Web via the Google search engine.

except for the 1 tagged article.

Nothing looked to me like exactly what you wanted, but there are several good foreign patents about dolls with removable masks. The problem is that none of them mention attaching the mask to the ears. However, I suggest that you still review all of the results.

Also attached is a search feedback form. Completion of the form is voluntary. Your completing this form would help us improve our search services.

I hope the attached information is useful. Please feel free to contact me (phone 305-5934 or email jeanne.horrigan@uspto.gov) if you have any questions or need additional searching on this application.

Abstract (Basic): US 6558221 B1

NOVELTY - A stencil mask (100) has a faceplate (112) with apertures (103-105) overlying **face** surface (20) of a **doll head** (17). The feature stamps (90) have raised image of a facial feature imprinted on its surface, when the feature stamps are moved through one of the apertures of the faceplate to contact the **face** surface.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for method of **doll** play.

USE - **Doll** having **face** stencil and stamp applied features.

ADVANTAGE - Allows user to imprint facial feature images on **face** surface of **doll head**, hence improves the appearance of the **doll**.

DESCRIPTION OF DRAWING(S) - The figures show the perspective views of the stencil mask.

- doll** (10)
- head** (17)
- face** surface (20)
- feature stamps (90)
- stencil mask (100)
- apertures (103-105)
- faceplate (112)

Puppets and protest: street theater, art, and vigil in the 21st century.

Winslow, Lulu
Whole Earth, 53(3)
Fall, 2002

ISSN: 1097-5268 LANGUAGE: English RECORD TYPE: Fulltext
WORD COUNT: 1331 LINE COUNT: 00106

... slippery sidewalks. Sometimes I bump my head. It is hard to know how high the " **head** " (**puppet head**) is. Usually about 8.5 feet, from what I can figure. It's comical to...

...cage, maybe a printed sign on a stick, maybe a drum or a rattle.

Often, **puppets** ' compelling grief and fascinating beauty have a magnetic effect. A **puppet** 's silence and emotion are larger than a human's. Eyes are drawn to the large sculptured faces moving along on top of little human legs and bodies. **Masks** and **puppets** change the emotional dynamics. They inspire awe. They push the edge of what it means to make our thoughts and feelings publicly known, what it means to resist fear.

Puppets catch the attention of people on the street, slow them down. The street becomes a...

DE 59200749	G			A45D-044/14	Based on patent EP 499067

Abstract (Basic): EP 499067 A

The **dummy head** (1) with or without hair for hairdressing and/or cosmetic training has a face **mask** (2) which is at least partly interchangeable or can be supplemented by a number of differently shaped face **masks**, with interchangeable nose, eyes, cheeks, **ears** and mouths.

Each oval, rectangular, round, or triangular face **mask** has different hair lengths, colouring, styles and facial features. The surface of the face-**mask** is skin-like to take cosmetics in the same way as natural skin.

ADVANTAGE - Facility for increased versatility.

Dwg.1,2/2

Abstract (Equivalent): EP 499067 B

An artificial **head** with a coiffure for use as a teaching object in the training of hairdressers and/or beauticians, in which the artificial **head** (1) consists of vinyl material and has an interchangeable face **mask** (2), in which a number of differently constructed face **masks** (2) are associated with the artificial **head** (1), characterised in that each of the face **masks** (2) is constructed naturally and differently in facial detail, is at least partially interchangeable and has a hair region which is differently constructed in hair length, hair colour and hair style.

Doll with face flap overlying markable face plate - has first set of facial features and related decorative items displayed when flap overlies plate

Patent Assignee: CEARFOSS R (CEAR-I)

Inventor: CEARFOSS R

Number of Countries: 001 Number of Patents: 001

Patent Family:

Patent No Kind Date Applicat No Kind Date Week
US 5046985 A 19910910 US 90630237 A 19901219 199139 B
Priority Applications (No Type Date): US 90630237 A 19901219
Abstract (Basic): US 5046985 A

The **doll** has a permanently imprinted **doll** face on a flap overlying a blank **face plate**. When the flap is in a down position, the **doll** is played-with in a conventional manner. When the flap is raised, the plate is revealed and the child can draw face designs on the plate.

A first set of facial features and related decorative items such as hair arrangements, bonnets, bows and the like are displayed when the flap overlies the plate. A corresp. second set of the above become revealed when the flap is lifted. The flap includes straps which releasably **secure** the flap when positioned over the **face plate** or, over the **doll head** back side.

USE - For stimulating and releasing a child's creative thought processes. (5pp Dwg.No.3/5

Designated States (Regional): AT CH DE LI NL

EP 292631 B

Designated States (Regional): AT CH DE LI NL

Abstract (Basic): EP 292631 A

Set for a **doll** 's **head** of a tectile toy for DIY enthusiasts uses a **mask** which is made by deep drawing plastic foil, usually transparent PVC, together with the tab. The punching tool has sectional blades so that a perforation makes it easier for the buyer to separate it from the package which has a slot for suspension, when it is displayed in the shop. The **head** insert is pref. made of polystyrene.

ADVANTAGE - Saves having to cut off the package and requires no tools to separate the **doll** 's **head mask** before covering it and the insert with cloth and a wig.

0/4

Abstract (Equivalent): EP 292631 B

Presentation support for a **doll mask** (2) for the front half of

a **doll head** , produced in part or entirely, together with the **mask** , out of a deep-drawn plastic sheet, characterized in that the presentation support (1) is in part or entirely formed of a remainder of the plastic sheet (1) which stretches out from the edge (3) of the **mask** , and in that the one-piece **connection** between the **mask** (2) and the presentation support (1) can be undone by hand. Abstract (Basic): US 5971763 A

NOVELTY - A soft skin **mannequin head** has a body with oval symmetrical facial configuration and with several flexible, elastic resilient and stretchable companion **masks** (14). Surface of make-up **mannequin head** and companion **mask** are capable of receiving and temporarily retaining cosmetic compositions at selected locations on the facial configuration.

DETAILED DESCRIPTION - The **masks** are formed as a shell open at one side and sized and shaped to conform to size and shape of the facial configuration portion of make-up **mannequin head**. The **masks** has facial configuration same as that of make-up **mannequin**. Each **mask** has a soft skin surface with skin tone and color representative of one of several human racial and ethnic origin. The **mask** is stretchable to be mounted on the facial portion of the body and elastically resilient to assume return **secure** engagement with the facial configuration of **mannequin head**.

USE - For use both in teaching and practice of both cosmetic make-up application of make-up for actress, actor, fashion **models** of both male and female and those individuals encompassing different racial characteristics, and permanent or tatto make-up application.

ADVANTAGE - After a short period of use and experience, the user is skilled quickly to enable the user to apply the eyebrow image creatively free hand, sufficiently. The acquired skills are useful in meeting the challenges encountered in the cosmetologists art and useful for cosmetic make-up application. Portability and lightweight of make-up **mannequin head** permits the cosmetic sales person to carry entire kit during demonstration thereby improving convenience. Enables the user to gain experience and to demonstrate to clients or others covering most human racial features, by provision of elastic resilient **masks** having skin tone and color representative of several human racial and ethnic origin. Nature of make-up **mannequin** and their companion **masks** can be economically beneficial in reducing the costs of operation of training institutions and the trainees and students attending them by eliminating the need for living **models**, for pooling of objects to be handled by trainees and students.

DESCRIPTION OF DRAWING(S) - The figure shows front perspective view of make-up **mannequin** kit.

Method of creating doll 's head face- mask - involves transferring photographic image onto flat transparent material prior to transferring it onto stretchy material and then onto face- mask

Patent Assignee: KOZAKIEWICZ E (KOZA-I)

Inventor: KOZAKIEWICZ E

Abstract (Basic): WO 9749471 A

In the method of creating the **doll 's head face-mask** , shaped with respect to preserving a man's face features, a colourful image of a completely revealed man's face is made, the face being illuminated, shot en face on the light background. Then, the photographic image of a man's face is retouched and by using a computer technique the photographic image of man's face is corrected to preserve the proportion of the **doll 's head face-mask** . The image is then transferred onto the flat transparent material and by using the transfer techniques the corrected photographic image of man's face is transferred onto the flat stretch material which is adjusted to be placed on the **doll 's head face-mask** .

The **doll 's head face-mask** , preserving shape, is coated with the flat stretchy material with the corrected photographic image of man's face transferred thereon in such a way that the correspondence of both the faces features and the proportion of the **doll 's head face-mask** is preserved. The material is then **connected** fast with the **doll 's head face-mask** , best by sticking it to it.

ADVANTAGE - Allows faster production times, better quality and reduced costs in manufacturing.

English Abstract

There is disclosed a soft skin make-up mannequin head having an "ideal" facial configuration. The make-up mannequin head has a smooth, realistic surface texture simulative of human skin. **The make-up mannequin head is accompanied by at least one flexible, soft skin, stretchable and elastically resilient companion masks (14) which is mountable tightly upon the mannequin head and is selectively removable therefrom.** Each of the companion masks carry a facial configuration identical to the facial configuration carried by the make-up mannequin head. The invention is

further directed to the provision of a make-up mannequin kit (10) which includes the make-up mannequin head and at least one companion mask. The mannequin kit also includes necessary tools for use in cosmetology training and permanent make-up techniques such as tattoo applications.

The mannequin kit further includes a plurality of companion masks, each simulative of human of a different ethnic or racial origin.

English Abstract

A very compact interactive toy is provided that provides highly life-like and intelligent seeming interaction with the user thereof. The toy can take the form of a small animal-like creature having a variety of moving body parts that have very precisely controlled and coordinated movements thereof so as to provide the toy with life-like mannerisms. The toy utilizes sensors for detecting sensory inputs which dictate the movements of the body parts in response to the sensed inputs. The sensors also allow several of the toys to interact with each other. The body parts are driven for movement by a single motor which is relatively small in terms of its power requirements given the large number of different movements that it powers. In addition, the motor is reversible so that the body parts can be moved in a non-cyclic life-like manner. For space conservation, a cam operating mechanism is provided that is very compact with the cam mechanisms for the parts all operated off of a single small control shaft of the cam operating mechanism, e.g. approximately one inch in length, driven for rotation by the single, low power motor.

US 4670070	A		4		

Abstract (Basic): US 4670070 A

A method of making a **doll** or **figurine** assembly comprises forming body and head portions for the **doll** or **figurine** from separate pieces for each of the torso, upper arms, lower arms, hands, upper legs, lower legs, feet and head. The method also involves securing the pieces together to form a complete **doll** assembly.

The method then comprises forming a head encasing mask from separate pieces for a nose, **ears**, head and top of head secured together. The assembly and mask are then decorated and removable securing the mask and assembly is carried out to form a completed **doll** or **figurine**.
